Monthly Money Raffle for Creators □□

Create a page, win money!

I am doing a monthly raffle to help the AnatomyArchive (Anatomy Archive) grow. I know it is time consuming to create a page, so I want to reward you! How to win

Everything you need to know when creating

Feel free to search for specific topics in this page: Use Ctrl + F for example

---

First of all

1. The AnatomyArchive is **English only** as of right now.

2. You need to have an account for creating a page. You can register here

3. You should be familiar with the Terms of Use, because the pages you create are free to use* for other people.

The Basics

4. Let‘s say you want to create a page—here are the first steps:
You go to *Shelves* (top right corner). You choose the *shelve* -> *book* -> *chapter* that is suitable for your page. Create a new page. There should be a template visible for you automatically—from here on out you are guided through the process of creating a full page.

If anything you need is missing contact me.

5. For the headline: Include your artist name in brackets, for example: *Musculus trapezius (Las)*

6. I want every artist to have freedom in how he/she wants to create a page for the AnatomyArchive. Stay in range of the templates, so that all pages are readable, but don't be shy to alter things to your liking.

7. Look at the two example pages Musculus trapezius and Musculus rectus abdominis for reference. Feel free to copy from them.

Also Important

8. You can save a page as a draft, close the site and work on it later. However, if you publish a page and it is not finished yet -> add the tag "not final" (you can add tags on the right hand side in the page editor) and write this somewhere:

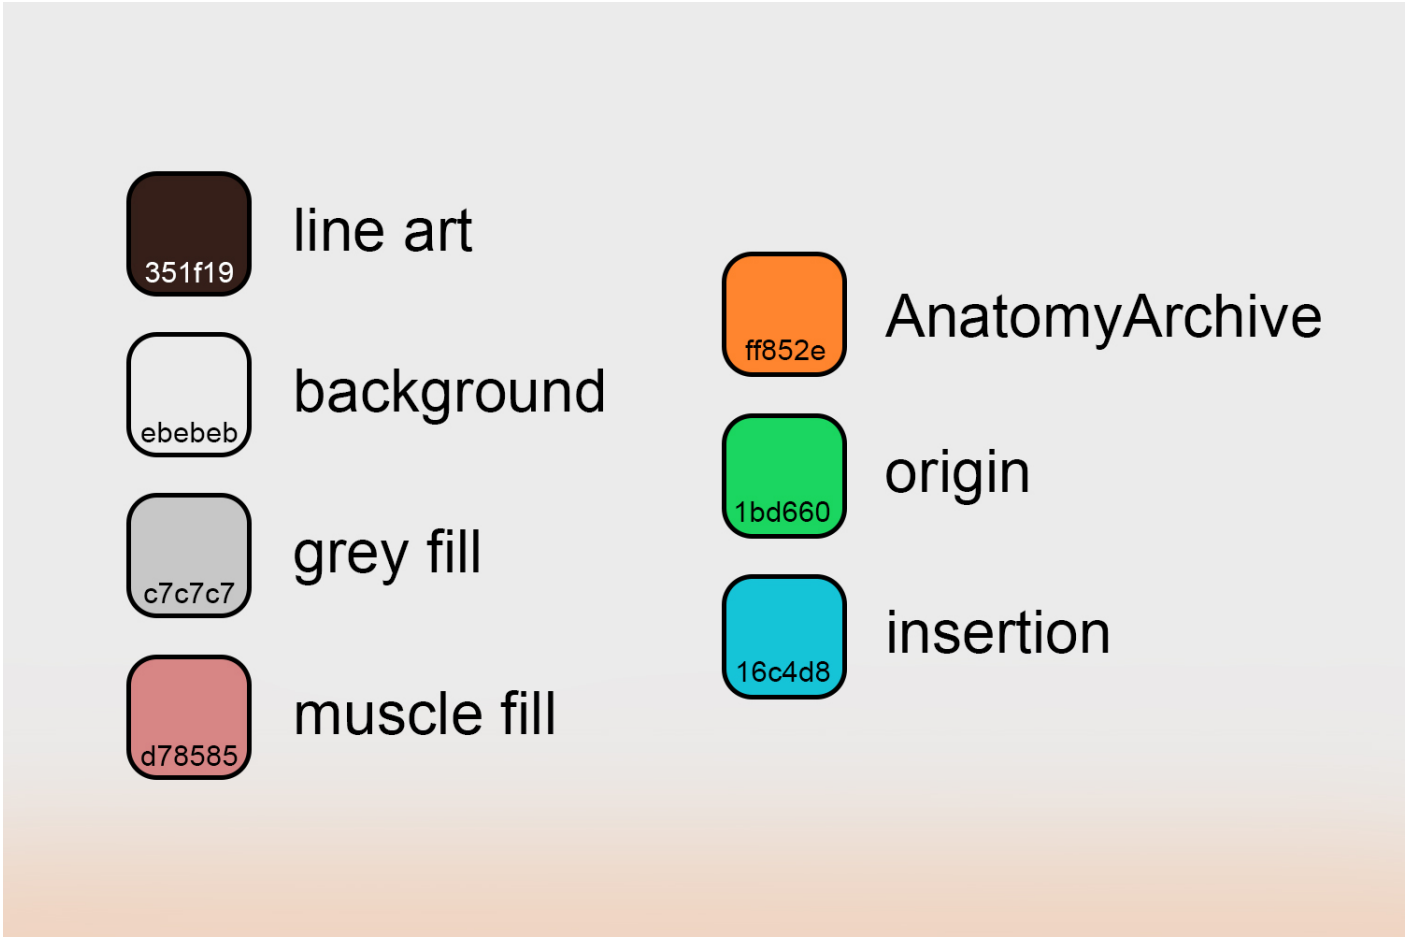

> not final

9. Turn on shortcuts, makes your life easier. You can find them in My Account.

The Drawings

10.

- You can technically use any image size you want, but I would **recommend staying below 500 KB per image** for the sake of SEO
- For digital art I liked 1500x1000px and saving it as a JPG instead of PNG, you can do whatever you want though
- The **minimum width however is 350px** so that the image fills the whole mobile width
- Avoid putting 2 pictures beside each other (it causes bugs sometimes)
- If possible draw on grey background, so that its appealing in both dark and white mode
- Here is a color sheet to help you out - **no need to use** it of course

If you have questions about any of this -> contact me please

Quick Pages Explained

Quick Pages are an option to post anatomy-related content with **minimal time effort**.

No need for complex explanations, just post your studies.

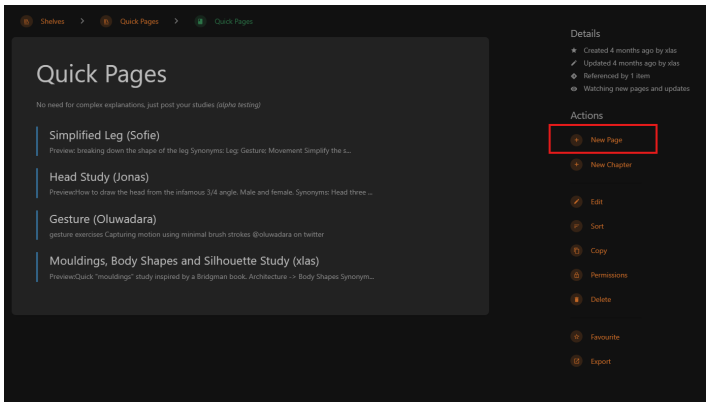

Click here to create your own Quick Page

(You need an account)

Additional

Additional Information

Why?

Help building the AnatomyArchive, so that one day it's the ultimate "Reference Book" (with the unique twist, that its written by many different people). Get your name out there. Connect with others that want to improve. Help other artists through your studies.

Pinterest

Helpful pages

1. Everything you need to know when creating ~ 3 minutes
2. Terms of Use ~ 1 minute

Complex Pages Explained

Complex Pages are an option to post more complete anatomy studies.

Connect Text with Drawings (paintings, 3D sculptures, ...)

Choose one of the current **Shelves** to create your own Complex Page

(You need an account)

Just test out the website, by creating a page right now. **Nobody can see your drafts except you.**

Upper Body

Lower Body

Various

How it works (in 2 Steps)

I would recommend to watch the intro video (5 minutes)

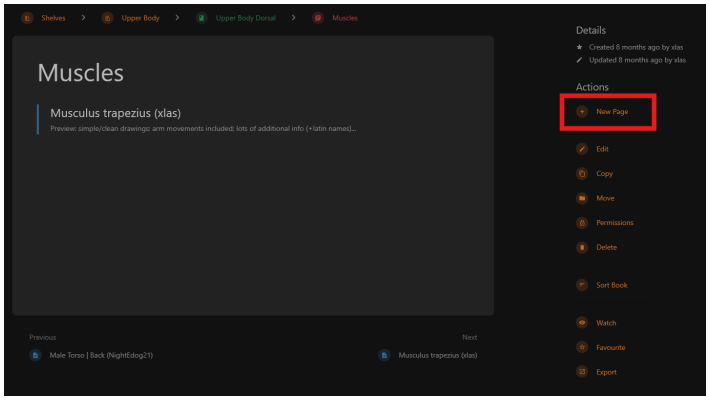

The Template

After creating a page you'll automatically get a **template** to help you out.
You can follow the guide or **do it your own way** and go offroad. Up to you
