Head/Face form study (solar)

Preview:
A perfectly simplified study for the head + skull; good reference for animation

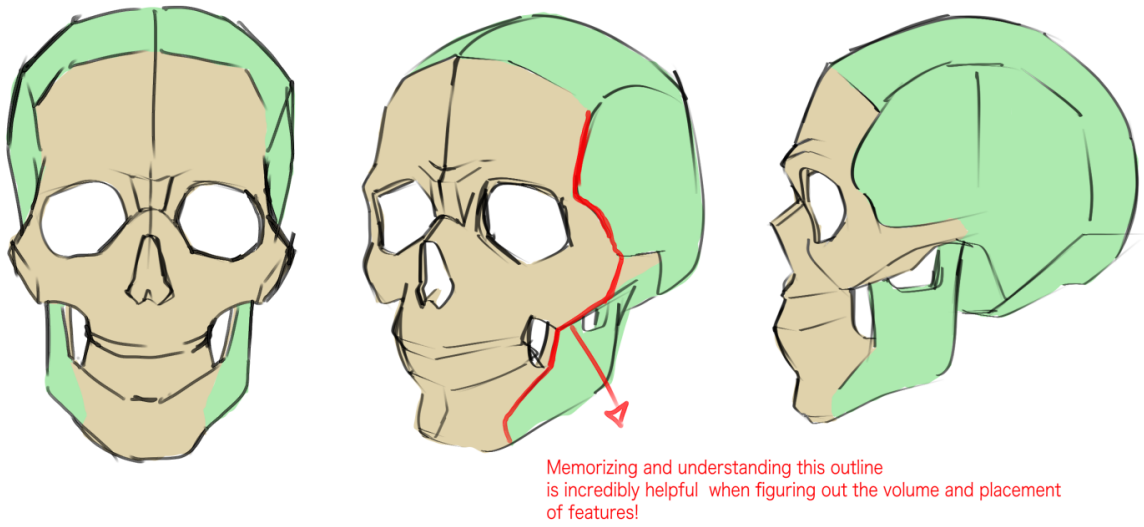

Synonyms: Simplified skull; Head animation reference; Head 3/4 view; Skull turnaround; Head turnaround

---

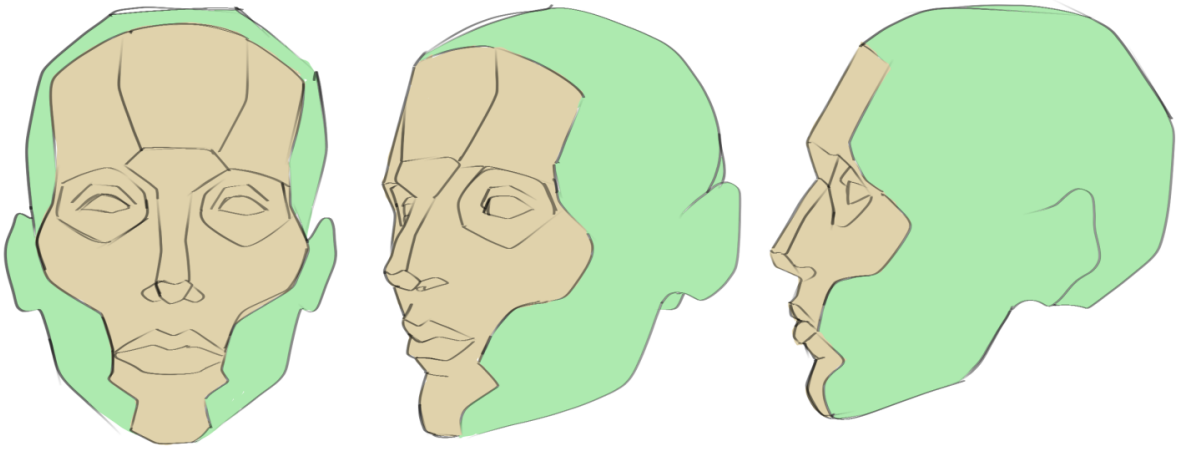

A simplified base for the head. When drawing the base circle, the excess parts on the sides are removed because the sides of the head are not perfectly round.

The skull simplified mostly focusing on the form and overall shape. Separated colors to focus on the change from the front plane of the face.

Applying facial features.
