Creator Template: Muscles

Preview:

This line will be visible as a preview to your page - write what makes your page special or write whatever you want.

About **86 characters** are visible -> here is a counter: wordcounter.net

Synonyms: Which names are commonly used for this muscle? (list the names with semicolons and leave this line Italic)

↓ From here on out you can **freestyle the page** however you like! The Template is just here to help.

Summary

What is the most relevant information that everyone needs to know?
Try to include the full latin name, where the muscle is, what it does and whats significant about it.

Basics

Introduce the muscle in a visual way and share other basic knowledge.
The first drawing should be general, kind of like a thumbnail for the muscle.
You can also add some text (only if necessary of course).

> **insert drawings that harmonize well with the summary**

Origin

Where does the muscle originate from?
*I did a page on what **Origin and Insertion** means, feel free to use the search bar up top after you saved your draft.*

Insertion

Where does the muscle insert?

>

> **insert drawings for origin and insertion**
> *If you want, do both in one drawing*

Functions

What is this muscle used for?

How to draw the muscle

You can work with simplified shapes so that other artists can memorize more information. You can also go more detailed, if that's what you prefer.
Different viewpoints help a lot with building a better understanding.
Drawings that visualize the functions mentioned before are always great.

> **insert drawings that help drawing the muscle**

Advanced

Everything beyond the basics

What is also important if one wants to study this muscle beyond the basics?
Go over the muscle more in detail and share intermediate up to expert knowledge.
This part is collapsed at first, because we don't want to scare the reader with too much text.

> **insert drawings if needed for explanation**

Reference Pictures (for study only)

Name the sources (websites) here, for example "From Wikimedia, Pixabay, Unsplash"

This part is collapsed at first, so that the images won't load when opening the article.

> **insert **real life** pictures**
>
> Please read the explanation here: https://www.anatomyarchive.org/books/information-for-creator/page/reference-pictures
> (you have to copy the link into your browser, I'm sorry)

↓ You can **promote your socials** or other personal projects in a comment after you publish the page! The first comment will always stay on top. Make sure to use links (If you prefer, you can also link your stuff right here / at the bottom of the page)
